Making Public Services Management Critical
Routledge

A number of public enterprise (PE) executives have long felt the need for a book which would provide necessary information and analysis of various dimensions of PE management and privatisation. The book provides at one place, a precise and authoritative account of the concept, policy, and analysis of major issues confronting PEs. Public ownership per se does not make PE performance sub-optimal. The operation of the Government system, of which PE is a sub-system, has not been conducive to performance. During the

last six decades, inadequate political will and vested interests have come in the way of freeing PEs from excessive and throttling controls, and demoralising accountability. Not letting the managers manage with the freedom required in the liberalised and globalised set-up is the problem. The multifarious and complex managerial problems of PEs, which get compounded by faltering moves towards privatisation, cannot be wished away. These have been considered in the book at some length. The book, first published in 1980, continues to be a standard work on the subject. This latest edition has been revised by Dr. R.K.Mishra, Director, Institute of Public Enterprise, Hyderabad.

Public History Beacon Press

The New Public Service: Serving, not Steering provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. It is organized around a set of seven core principles: (1) serve citizens, not customers; (2) seek the public interest; (3) value citizenship and public service above entrepreneurship; (4) think strategically, act democratically; (5) recognize that accountability isn't simple; (6) serve, rather than steer; and (7) value people, not just productivity. The New Public Service asks us to think carefully and critically about what

public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important, and meaningful about public service and considers how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and research over the past 15 years. Although the debate about governance will surely continue for many years, this compact, clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading for students and serious practitioners in public administration and public policy.

Public Relations and Social Theory Teachers College Press

At a time when faculty roles are under great scrutiny and faculty work itself has an uncertain future, this book offers a new approach to examining academic professionalism. This

collection of essays applies a philanthropic lens to contemporary debates and considers academic work completed out of a moral responsibility to the public good. It provides a counterpoint to narrow conceptions of appropriate faculty work as limited to the production of credit hours and research dollars and offers evidence that faculty can have a wider role both within and beyond the “ivory tower.” By examining faculty members’ many contributions, not only to students but to society-at-large, *Faculty Work and the Public Good* provides an alternate perspective on America’s colleges and universities that will help preserve and expand professorial contributions to the public good. Although not all faculty are philanthropically inclined, highlighting those who are will help preserve valuable aspects of faculty work and encourage more such contributions to society. This volume is an essential read for higher education policymakers, trustees, and administrators; students and scholars of higher education and philanthropy; and

individual faculty concerned about their profession. Contributors: Ann E. Austin, J. Herman Blake, Dwight F. Burlingame, Denise Mott DeZolt, Sean Gehrke, Audrey J. Jaeger, Adrianna Kezar, Jia G. Gappa, professor emerita, Purdue University [Aging, Social Inequality, and Public Policy](#) Princeton University Press Exposes the new

generation of whiteness thriving at the expense and borrowed ingenuity of black people—and explores how this intensifies racial inequality. American culture loves blackness. From music and fashion to activism and language, black culture constantly achieves worldwide influence. Yet, when it comes to who is allowed to thrive from black hipness, the pioneers are usually left behind as black aesthetics are converted into mainstream success—and white profit. Weaving together narrative, scholarship, and critique, Lauren Michele Jackson reveals why cultural appropriation—something that's become embedded in our daily lives—deserves serious attention. It is a blueprint for taking wealth and power, and ultimately exacerbates the economic, political, and social inequity that persists in America. She unravels the racial contradictions lurking behind American culture as we know it—from shapeshifting celebrities and memes gone viral to brazen poets, loveable potheads, and faulty political leaders. An audacious debut, *White*

Negroes brilliantly summons a re-interrogation of Norman Mailer's infamous 1957 essay of a similar name. It also introduces a bold new voice in Jackson. Piercing, curious, and bursting with pop cultural touchstones, *White Negroes* is a dispatch in awe of black creativity everywhere and an urgent call for our thoughtful consumption.

Biopolitical Surveillance and Public Health in International Politics SAGE
Public Relations and Social Theory: Key Figures, Concepts and Developments broadens the theoretical scope of public relations studies by applying the work of a group of prominent social theorists to make sense of the practice. The volume focuses on the work of key social theorists, including Max Weber, Karl Marx, John Dewey, Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Dorothy Smith, Zygmunt Bauman, Harrison White, John W. Meyer, Luc Boltanski and Chantal Mouffe. Each chapter is devoted to an

individual theorist, providing an overview of that theorist's key concepts and contributions, and exploring how these can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist, along with recommendation of key works and secondary literature.

An experimental novel about mirrors, maps, relationships, about the ocean, elusive success and possible happiness. Weaving overheard dialogue, sexual encounters, and elements from the I Ching, Tarot, and palmistry, Lippard charts changing relationships among four people. Written in 1970, this novel brings to life political, feminist and aesthetic struggles of its time.

Public Disorder and Globalization Routledge
Author, Fred C. Pompel, treats age as a component of social inequality which gives rise to the three major themes of the text: diversity in the experience of individuals, differences in public policy, and

variations across nations. Comparison of the United States with other nations is a central component of the book, providing a greater understanding of the larger forces that shape old age.

The Domestic Dimension of Public Diplomacy IGI Global

While public affairs faculty study administration and management techniques,

few administrators of public affairs programs receive formal training in the nuts and bolts of academic administration. Even those faculty who come to academia after distinguished careers in managerial positions may not be ready for the very different (and difficult) environment of university administration. The Public Affairs Faculty Manual argues that public affairs as a field needs to ensure that knowledge about administration and management is applied to the running of its academic programs, and brings together major leaders in the discipline to explore key features of academic administration. Many of these leaders have served as Master of Public Administration (MPA) directors, chairs, and deans at the nation's top public affairs programs. Crucial issues of academic administration discussed include the basics of public affairs programs, models of governance, roles of different administrative leaders, planning and budgeting for programs, navigating the accreditation process, assessing and improving student learning, ensuring social equity and cultural competency, mentoring

faculty, developing curriculum, and helping provide service and applied research to community partners. Contributors have served as MPA directors, chairs, and deans at the nation's top public affairs programs. Themes running throughout the book's chapters are examined, and additional resources to help manage public affairs programs are offered. This collection of essays and the strategies within it are designed to encourage faculty to assume positions of leadership in their programs and manage those programs in an effective, efficient, and fair manner. The Public Affairs Faculty Manual is required reading for new, seasoned, and aspiring academic administrators in public administration, public policy, and nonprofit management programs, as well as schools of government. *White Negroes* Routledge

In this book, scholars from a wide range of disciplines respond to Habermas's most directly relevant work, *The Structural Transformation of the Public Sphere*. The relationship between civil society and public life is in the forefront of

contemporary discussion. No single scholarly voice informs this discussion more than that of Jürgen Habermas. In this book, scholars from a wide range of disciplines respond to Habermas's most directly relevant work, *The Structural Transformation of the Public Sphere*. From political theory to cultural criticism, from ethics to gender studies, from history to media studies, these essays challenge, refine, and extend our understanding of the social foundations and changing character of democracy and public discourse. Economic models in much of the public economics

literature have been slow to reflect the significant changes towards double-income households throughout the developed world. This graduate-level text develops a more sophisticated approach to household economics, one that allows for multiple-income earners and shared decision-making. This approach is used to present a fundamentally new view of consumption. It then applies this to an analysis of tax systems, combining theoretical analysis of optimal taxation and tax reform with careful empirical study of the characteristics of income tax systems in four different countries: Australia, Germany, the UK and the USA. The book is particularly concerned with analysing, both theoretically and empirically, the impact of taxation on female labour supply, and identifying its effects on work incentives and fairness of income distribution. All this adds up to a fascinating new approach to the economics of household for researchers in both public and private sectors. *Public Administration in Palestine* Columbia University Press

Abortion. Physician-assisted suicide. Same-

sex marriages. Embryonic stem-cell research. Poverty. Crime. What is a faithful Christian response? The God of the Bible is unquestionably a God of justice. Yet Christians have had their differences as to how human government and the church should bring about a just social order. Although Christians share many deep and significant theological convictions, differences that threaten to divide them have often surrounded the matter of how the church collectively and Christians individually ought to engage the public square. What is the mission of the church? What is the purpose of human government? How ought they to be related to each other? How should social injustice be redressed? The five noted contributors to this volume answer these questions from within their distinctive Christian theological traditions, as well as responding to the other four positions. Through the presentations and ensuing dialogue we come to see more clearly what the differences are, where their positions overlap and why they diverge. The contributors and the positions taken include Clarke E. Cochran:

 Derek H. Davis: A Classical Separation Perspective
 Ronald J. Sider: An Anabaptist Perspective
 Corwin F. Smidt: A Principled Pluralist Perspective
 J. Philip Wogaman: A Social Justice Perspective

The work of academics can matter and be influential on a public level, but the path to becoming a public intellectual, influential policy advisor, valued community resource or go-to person on an issue is not one that most scholars are trained for. The Public Professor offers scholars ways to use their ideas, research and knowledge to change the

world. The book gives practical strategies for scholars to become more engaged with the public on a variety of fronts: online, in print, at council hearings, even with national legislation. Lee Badgett, a veteran policy analyst and public intellectual with over 25 years of experience connecting cutting edge research with policymakers and the public, offers clear and practical advice to scholars looking to engage with the world outside of academia. She shows scholars how to see the big picture, master communicating with new audiences, and build strategic professional networks. Learn how to find and develop relationships with the people who can take your research and ideas into places scholars rarely go, and who can get you into Congressional hearings, on NPR, or into the pages of The New York Times. Turn your knowledge into clear and compelling messages to use in interviews, blog posts, tweets and op-eds. Written for both new and experienced scholars and drawing on examples and advice from the lives of influential academics, the book provides the skills,

resources, and tools to put ideas into action.
